## Holiday Season Brings Holiday Cyber Attacks

Read Why!

The holidays are the peak season for hackers and cyber attacks. They wait all year, scheming up ways to create their own holiday cheer. While customers are shopping for the best deals, hackers are looking for the best opportunity to strike your business with malware, ransomware, and phishing attacks.

The image is a festive banner for the holiday season. It features a dark background with various holiday-themed items: a red and white Santa hat, a smartphone, a laptop with hands typing, and several wrapped gifts. The text 'STAY CYBER-SECURE OVER THE HOLIDAYS' is prominently displayed in white, bold, uppercase letters across the top of the banner.
