Cornerstone FM's 43rd Wonder Walk

When it comes to giving back to the community, there's no doubt that Data-Tech doesn't shy away from stepping up to the plate. Cornerstone Family Ministries has been a longtime client of ours and continuously impacts our community. Data-Tech is a proud sponsor of Cornerstone FM's annual Wonder Walk, which nearly raised \$120,000 this past month. And wow, was it a sight to see! With over 600 attendees strolling along the gorgeous Bayshore Boulevard on a sunny May day, it's no wonder they call it a "Wonder" Walk. All proceeds go towards early learning scholarships for the little ones who attend the Rosa Valdez Early Learning centers. Data-Tech was all smiles knowing they played a part in helping out such a great cause!

Ransomware Prevention

To protect against ransomware, the CISA recommends the following precautions:

- Regularly update software and operating systems with the latest patches
- Never click on links or open attachments in unsolicited emails
- Back up data regularly on a separate device and store it offline
- Follow safe practices when using devices that connect to the internet

WHAT'S THE BEST DEFENSE AGAINST RANSOMWARE?

WHEN SOMEONE THINKS THEIR BUSINESS WON'T EVER BE AFFECTED BY RANSOMWARE

WHEN THEY GET HIT WITH RANSOMWARE A WEEK LATER

#FUNNYBUTNOT

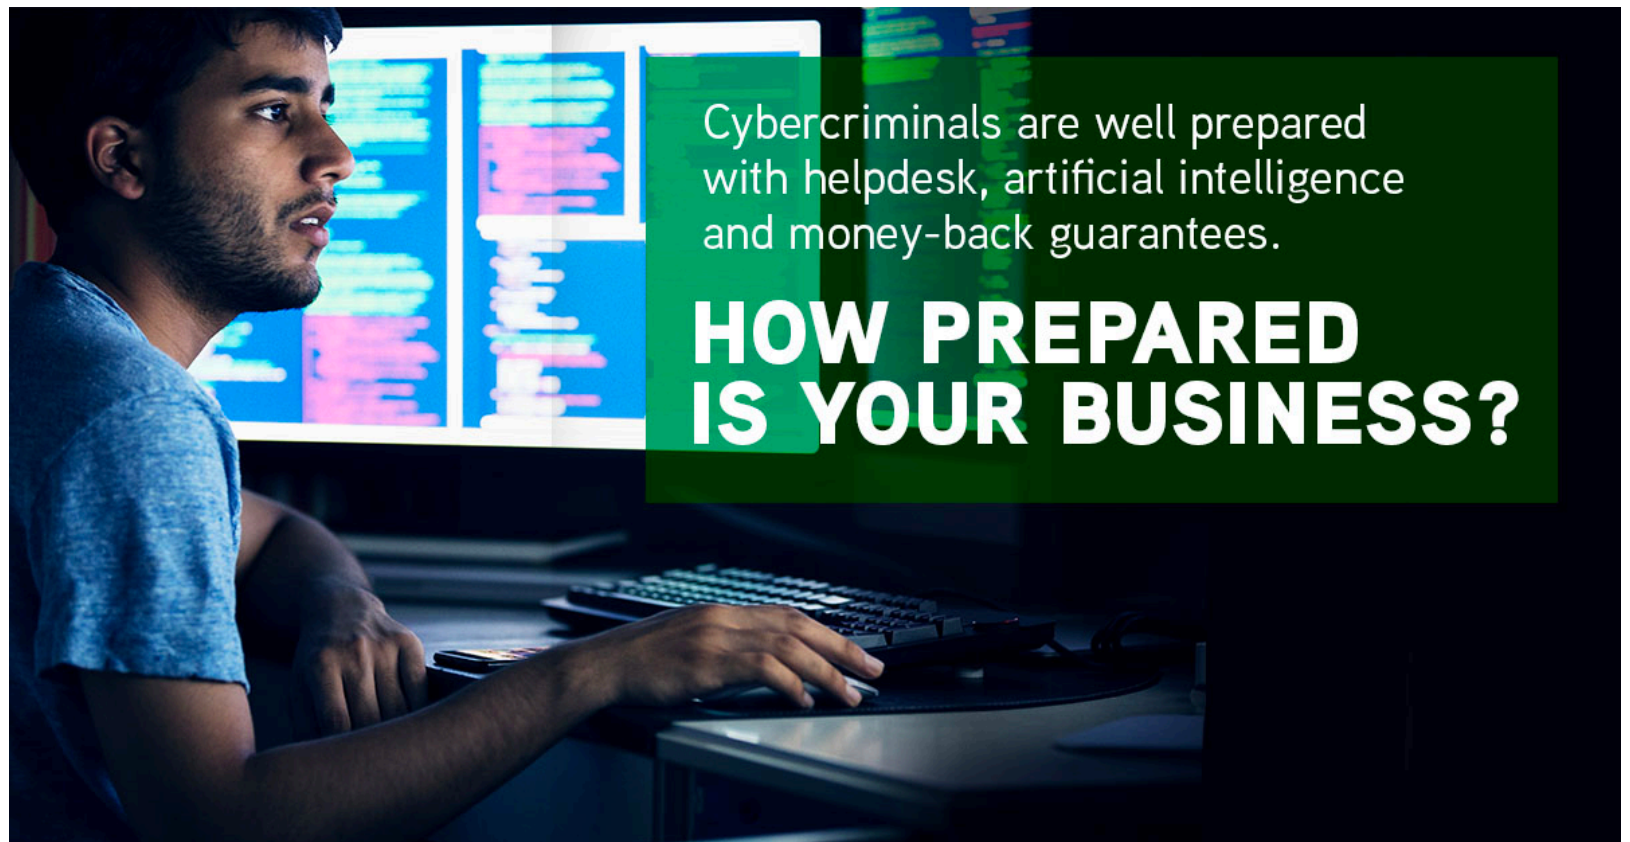

It's true 😊 Too many times we come across ransomware victims who believed their business would never get attacked. And trust us, we DON'T want your business to get hit with ransomware, but we do want you to be proactive and take measures to prepare for any disaster.

Invest your money in affordable cybersecurity services such as Backup & Disaster Recovery, Managed IT Services, or Cloud Solutions. It will ALWAYS cost you less to have these security measures in place than to pay a hacker the ransom! Not to mention business downtime and possible lawsuits if data is leaked...

MONEY INVESTED IN CYBERSECURITY

WILL ALWAYS COST LESS THAN PAYING A RANSOM

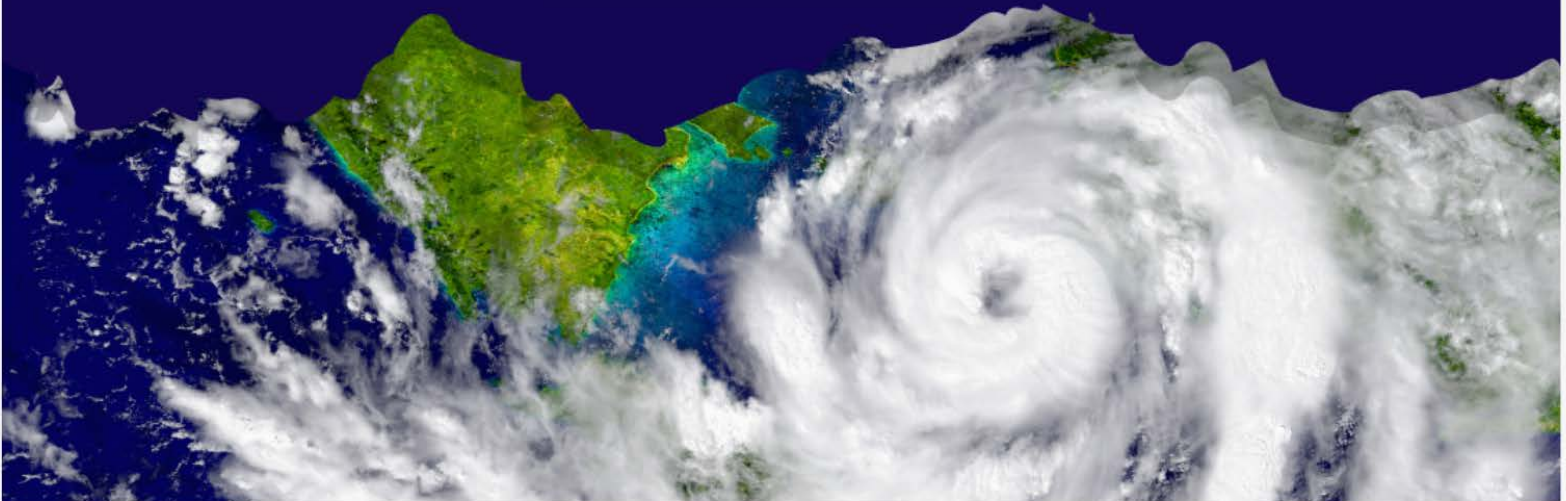

Cybercriminals are well prepared with helpdesk, artificial intelligence and money-back guarantees.

HOW PREPARED IS YOUR BUSINESS?

Hurricane Preparedness

HURRICANE SEASON**

Insider Threats - Compliance

Testing cybersecurity solutions is of utmost importance to ensure the implementation of your IT services are safeguarding your business against insider threats and also maintaining up-to-date compliance requirements. As technology evolves, so do the methods and sophistication of cyber attacks, making it crucial to regularly assess and validate the effectiveness of security measures. By conducting comprehensive testing, organizations can identify vulnerabilities, assess the resilience of their systems, and proactively address any potential weaknesses.

When was the last time you *tested the effectiveness of your cybersecurity solutions?*

SOMETIMES COMPLIANCE VIOLATIONS ARE FOR **THINGS YOU DIDN'T DO.**

Additionally, testing helps businesses stay compliant with industry regulations and legal obligations, demonstrating due diligence and a commitment to safeguarding sensitive data. By continuously evaluating and refining cybersecurity solutions, companies can minimize the risk of insider threats, protect their assets, and maintain the trust of their customers and stakeholders. Maintaining regulatory compliance standards will save your business money in the end.
